Certificate

We confirm that you have participated in the survey for neonatal bilirubin in serum.

You have met the requirements of the survey for the following analytes:

Total bilirubin

(2)

This certificate is according to the current version of the RiliBÄK valid until the end of November 2023.

hear p. holie

The number in parentheses characterizes the analytical method used.

The assignment of the number to the respective method and/or the respective instrument is to be taken from the total evaluation.

Listing and Evaluation of all your results

Explanations

Certificate

A certificate is issued (given) for an analyte only if the basis for an evaluation of the accuracy is given by the guidelines of the German Medical Association and/or if an evaluation is possible in analogy to these guidelines (see comments on the evaluation) and, if both results for an analyte are within the given acceptance limits. (marked as '+' below C)

Certificate of participation

In the participation certificate all analytes which are included in the list on this page are listed. If all analytes are listed on the certificate no participation certificate is printed.

Legend: C=Certification, M=No of method, R=your result, D=difference (R-T)

Dmax= maximum allowable amount of difference in measurement, partly given by
annax 1 of the guideline of the BAK (Dt. Arzteblatt 111, Heft 38, 19.9.2014).

T = target value, either reference method value or assigned value, LL | UL = lower resp. upper limit

Certification: + = fulfilled (quotient | D/Dmax | <= 1.0)
-= not fulfilled (quotient | D/Dmax | > 1.0
± = certification cancelled because of technical and/or analytical reasons
